

TELMAR NETWORK TECHNOLOGY TECHNICAL TRAINING PROGRAMS

LEARN FROM THE EXPERTS

Telmar offers world-class training for technicians and support personnel who perform day-to-day operations and maintenance on Telmar's cross-connect and add-drop multiplexer products. Our team of experts is also available to train your in-house team on how to manage your network. All training classes are conducted at our global headquarters in Plano, TX and include valuable hands-on lab experience.

In addition to classes offered at Telmar's world-class training center, we offer on-site training at your convenience. On-site classes require a minimum of four students per class or a maximum of 10 students per class.

Even if you do not own any of Telmar's products or use Telmar for any of our other services, we can provide CTAC support or customized training for your in-house network management team.

Benefit from Telmar's Training Programs

- Hands-On Lab
- Experience
- On-Site Training
- Customized Training
