

TELMAR NETWORK TECHNOLOGY NETWORK SERVER & SYSTEM REPAIR

You never know when your network server or system will go down or have problems, but you can have a plan in place to ensure you get it back up with little down time.

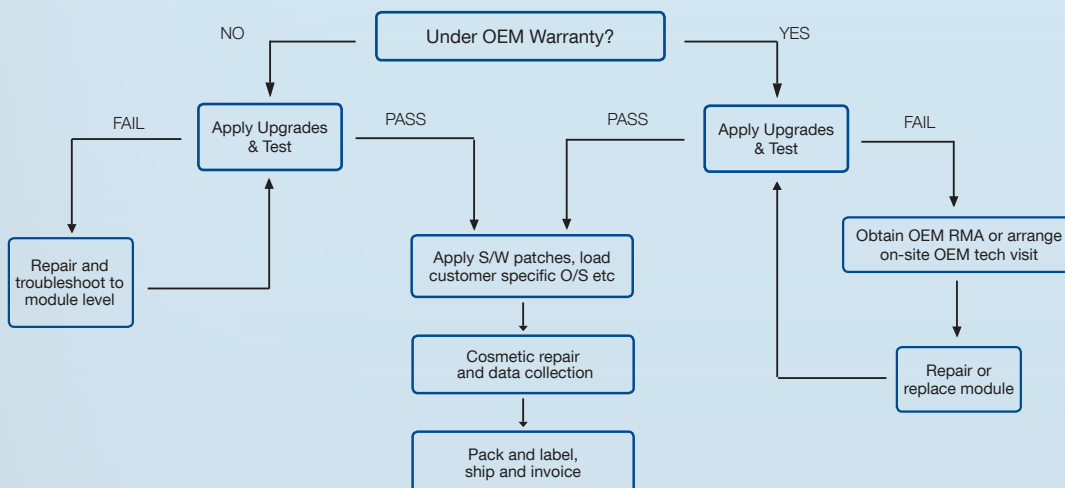

Telmar's Server Repair (TSR) provides the quick solution you need to repair your network data servers or systems including Dell, IBM and HP. Our network engineers and server technicians are trained in multi-vendor repair, and all repairs are completed at one of our world-class facilities that have achieved TL 9000 certification.

Telmar repairs network servers that are out of warranty or under warranty, and all repaired equipment that is not covered by an OEM's warranty, comes with at least a one-year warranty from Telmar.

DATA SERVER REPAIR PROCESS

Our data server repair process includes:

- Upgrade application and testing
- Troubleshoot and repair to module level as needed
- Application of software patches, and load customer-specific O/S
- Cosmetic repair as needed
- Data collection as needed

Telmar offers multi-vendor repair for network servers and systems at our repair facilities in Plano, Texas, and Tampa, Florida, including:
